

## **Why did you receive this information?**

You are so indoctrinated, as are most people, by false information regarding climate change that physical facts are taken as heresy and rejected with consensus based arguments.

The greatest failing of logic in science is what philosophers call "an appeal to an (inappropriate) authority" and the IPCC is about as inappropriate as you can get.

Enclosed you are presented only with facts and you can either take them or leave them it is up to you.

If you start to understand the reality of this issue you can join in the fight against Kyoto and help the environment and if you choose not to you can help perpetuate this political atrocity and continue to harm the environment.

I will leave it up to you.

Hans Schreuder
