

You are hereby presented with the definitive paper on the UN IPCC, its formation and exposing the premeditated fabrications by just three (3) people who have captured and distorted climate science and environmental politics for the last 20 years.

http://scienceandpublicpolicy.org/commentaries_essays/climate_science_corrupted.html (27 pages)

UN IPCC reports and the UN IPCC's core claim of human warming are fabrications made with falsities, misrepresentations and unscientific and/or dishonest manipulating of data. As politicians, you have all been misled and conned by the UN IPCC.

The paper reveals, with references and quotes, that the UN IPCC's conclusions were cemented by senior UN bureaucrats in 1985, before the UN IPCC was formed.

Despite lack of any measured, scientific real-world evidence and despite much solid contrary evidence, that unfounded, false position has, at great cost, been carefully and fraudulently preserved.

The paper reveals how the UN IPCC has calculatedly and carefully misled governments and the media world-wide. Its premeditated methods are laid bare for you.

From its inception, the UN IPCC has been continually and fraudulently fabricating both unfounded climate alarm and fabricating 'scientific consensus' to manipulate public opinion.

I can understand how you as a parliamentarian have been misled. I empathise with your predicament.

The paper confirms that the UN IPCC has never had any measured, scientific real-world data as evidence for its core claim that human production of carbon dioxide (being just 3% of Nature's annual CO₂ production) caused our planet's latest period of modest 'global warming' that in any case ended before 2000. It also confirms the UN IPCC still has no such data in 2009. None. Because none exist.

It explains how and why the UN IPCC ignored the huge amount of scientific data proving natural climate drivers control global climate. This material exposes UN IPCC fraud and its complete lack of measured scientific real-world data for its unfounded core claim. Satellites confirm Nature has returned global average temperatures to those of 1958 and continually dropping at a great rate.

You now have all you need to make an informed choice when you vote on any of the government's energy taxes, based as they are on the fallacious claim of "reducing emissions in order to control the climate". Control the climate? King Canute would be envious of you all.

Will you act responsibly and respectfully for science when UN IPCC after 20 years is still not doing so?

Your choice. Ultimately, we all leave behind only our names. For your sake, I hope you invest a few minutes of valuable time to read McLean's paper.

Finally, John Gummer, I am wondering whether you have yet been briefed on the major scandal (dubbed "ClimateGate") that has enveloped the Hadley Centre (UEA's Climate Research Unit) over the last few days, whereby 61 megabytes of hacked data and emails has been posted on the internet. This information appears to show unequivocally that top scientists manipulated data to bolster their argument that global warming is genuine and is being caused by human actions. If the picture of scientists falsifying the data for IPCC reports is found to be correct – and the damning emails certainly appear to be genuine – then the underlying rationale for the ETS, the Kyoto Protocol, and all other global warming based policies, will be seen to be baseless at best.
