Climate Change - "The only tipping point to come is the tipping point of public opinion against the alarmist falsity of Climate Change Policy" says climate scientist

"Obama's speech to the UN's Global Warming Summit on 22 Sept was a shameful pack of alarmist falsity. The integrity of the so-called science he espouses is as low as that preached by scientists under the thumb of totalitarian regimes or certain tobacco companies in the past" said Piers Corbyn of WeatherAction long range forecasters.

"But haven't we been here before? Remember the UN Security Council Feb 2003 hearing 'evidence' of Weapons of Mass Destruction to justify the Iraq war?"

UN weapons inspector Hans Blix was unable to find any weapons of mass destruction
<http://www.dailymail.co.uk/news/article-539350/From-WMD-Stop-The-War-The-disastrous-claims-launched-Iraq-invasion-historic-stand-war.html>

"The purpose of the Global Warming campaign of falsity here is clear - control by the West of world development and energy supply - imposing unnecessary technology to solve problems that don't exist and thereby imprison the developing world into reliance on a new green bubble of false value created by the West. It is rather like how GM crops can imprison poor farmers and Microsoft imprisons us all in their lorry loads of software when a spoonful would do. Its purpose in the West is as a **Weapon of Mass Taxation** - to back the new bubble of false value.

"If they had evidence of their Global Warming claims surely world leaders would show it to the world. Yet the UN still haven't replied to the letter from 'The gang of 13' scientists in July 2008 asking for simple evidence of the UN claims on Global Warming –

http://www.tech-know.eu/uploads/Letter_UN_Sec_Gen_Ban_Ki-moon.pdf .

"I suggest the UN appoint an Inspector of Global Warming to look for evidence and report back but do it before the tragedies instead of too late which was the case when Hans Blix finally reported back that there were no WMDs in Iraq - after the Iraq war began and after Dr David Kelly died.

"It is incumbent on all who care about the integrity of science to fight for the truth and perhaps the truth is slowly getting through. ***The only tipping point to come in Climate Change is the tipping point of public opinion on Climate Change Policy.*** We will discuss how to get to this, along with advances in the Solar Weather Technique of long range weather and climate forecasting at our Climate Fools Day conference in London on October 28th* "

*** Further information and pre-discussion at WeatherAction Press Conference Friday Sept 25th 12noon.**
