

JUST TWO FACTS:

1. CARBON DIOXIDE EMISSIONS HAVE NO EFFECT UPON ATMOSPHERIC TEMPERATURES

By C3 Headlines

2. SOLAR ACTIVITY RULES OUR PLANET, ALWAYS HAS AND ALWAYS WILL

By Dr. Niroma, Finnish climatologist

"Some of the more hysterical and extreme claims about global warming appear symptomatic of a pagan emptiness, of a Western fear when confronted by the immense and basically uncontrollable forces of nature. Perhaps they're looking for a cause that is almost a substitute for religion. In the past pagans sacrificed animals and even humans in vain attempts to placate capricious and cruel gods. Today they demand a reduction in carbon dioxide emissions, killing people through starvation and cold, causing untold misery and poverty for untold millions."

Peter Maxwell, Feb 2012
